Gulf Coast Birds: A Folding Pocket Guide To Familiar Species (Pocket Naturalist Guide Series)

Synopsis

The coastal wetlands, mangrove forests and dune habitats are the permanent or temporary home of over 400 species of birds. This beautifully illustrated guide highlights over 140 familiar and unique species and includes a map featuring prominent bird-viewing areas. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.

Customer Reviews

This is a basic birding guide for the most common types of birds of the Gulf coast. the pictures are bright and clear, the descriptions adequate. This will help a birder to separate the common from the uncommon, but doesn't help with identifying those uncommon birds. It is not designed to do this. The laminated heavy card-stock should hold up well.

For years, I collect this Field Guides wherever I travel. I'm a birder. This is easy to carry and also helps me when I take photos. If I photograph a bird I can always go to this guide and identify the exact bird I took a photo of. Great photos to help you identify the birds.

I just love this easy to use guide. It is plastic coated so it doesn't tear. Good pictures of all the birds. My grandchildren are learning different types of birds in our estuary backyard with this guide.

This little laminated guide is wonderful to take with you on walks so you can identify the birds you may run across. As we just moved to Florida from up North we wanted to be able to understand and name the different birds in our new home.

I love these guides! They are perfect for when you are not birding (sightseeing or at locations where birding is not your main focus). Lightweight, laminated so they don't get dirty, and fit into pockets or pocketbooks for ease of use.
